MONTANA EMPOWERMENT CENTER, INC.

Exceptional Children, Extraordinary Potential

Accommodations for IEPs and 504s

Classroom/Learning Environment

- Keep the workspace clean and clear of unrelated materials
- Keep the classroom or learning area quiet during intense learning times
- Reduce visual distractions in the classroom/learning environment
- Provide a computer for written work
- Seat the student close to the teacher or a positive role model
- Use a study carrel (In a classroom environment, provide extra carrels so the student will not feel singled out.)
- Seat the student away from windows, doorways, and radiators
- Provide a clear view of the board, teacher, and screen
- Keep extra materials (pencils, paper, erasers, rulers) on hand
- Provide additional personal space between desks
- Post a visual schedule on the student's desk
- Use a pass system for students needing frequent movement breaks
- Provide headsets to block noise
- Provide FM or a sound-field amplification system for listening
- Provide accessible classroom locations and accessible furniture (such as desks, tables, wobble chairs, etc.)
- Provide organizers for lockers/desk
- Provide assistance when moving between classrooms or around the building
- Allow the student to leave the classroom 2-3 minutes early to avoid crowded hallways
- Provide preferential seating for visual, auditory, or behavioral needs
- Allow the use of assistive technology
- Allow for small group and/or individual instruction

IDEAs that Work
Office of Special Education Programs
U.S. Department of Education

The contents of this publication were developed under grants from the U.S. Department of Education, #H328M200081. However, the contents do not necessarily represent the policy of the U.S. Department of Education and you should not assume endorsement by the Federal Government, Project Officer, David Emenheiser.

CURRICULUM

Directions

- Use both oral and printed directions
- Give directions in small steps using as few words as possible
- Number and sequence steps in a task
- Allow the use of a cell phone or other assistive technology device to record directions
- Have the student repeat the directions to check for understanding
- Highlight keywords in directions
- Show a model of the end product (such as a completed math problem or a definition)
- Provide visual aids
- Stand near the student when giving directions and cue the student that it's time to pay attention
- Clarify/simplify/repeat directions

Textbooks

- Provide a summary of each chapter
- Ask peer readers to read questions or passages aloud
- Use a marker to highlight important information in textbook sections
- Provide two sets of classroom curriculum materials: one for home and one for school
- Provide the student with a list of discussion questions before reading the material
- Provide books and other written materials in alternate formats such as Braille, large print, audio formats, and digital text
- Provide alternative books with the same concepts but at an easier reading level
- Explore the use of assistive technology
- Provide audiotapes of textbooks — have the student follow the text while listening
- Provide interesting reading material at or slightly above the student's comfortable reading level
- Use word-for-word sentence fill-ins
- Use index cards to record major themes
- Give page numbers to help the student find answers

This educational material is the intellectual property of The Montana Empowerment Center, Inc and is to be used for educational purposes only.

The contents of this publication were developed under grants from the U.S. Department of Education, #H328M200081. However, the contents do not necessarily represent the policy of the U.S. Department of Education and you should not assume endorsement by the Federal Government, Project Officer, David Emenheiser.

Assignments

- Provide a vocabulary list
- Shorten assignments to focus on mastery of key concepts
- Substitute alternatives for long writing assignments (such as clay models, posters, panoramas, collections, electronic presentations, or oral presentations)
- Give alternatives to long written reports (for example, write several short reports, preview new audio-visual materials and write a short review, or give an oral report on an assigned topic)
- Provide alternatives to reading aloud in front of the class
- Shorten spelling tests to focus on mastering the most functional words
- Specify and list exactly what the student will need to learn; review this frequently
- Mask (block or white out) unnecessary content (such as navigational buttons, menu, additional questions, etc.) so students can focus on the assignment one step at a time

Math

- Allow the student to use a calculator without penalty
- Read and explain story problems or break problems into smaller steps
- Group similar problems together (such as addition in one section, unless testing to see if the student can determine which function to use)
- Provide fewer problems on a worksheet (for example, 4 to 6 problems per page rather than 20 or 30, but keep the same total number of problems)
- Tape a number line to the student's desk
- Use pictures or graphics
- Use enlarged graph paper to help the student keep numbers in columns
- Provide a table or chart of math facts for reference (unless testing math facts)
- Circle math computation signs
- Require the student to solve fewer problems to focus on mastery of concepts

This educational material is the intellectual property of The Montana Empowerment Center, Inc and is to be used for educational purposes only.

TEST-TAKING AND GRADING

Time

- Alert the student several minutes before a transition from one activity to another
- Provide additional time to complete a task
- Increase wait time for responses
- Allow a specified amount of extra time to turn in homework without penalty
- Provide a visual timer
- Allow for an extended time to take a test
- Allow the student to bring and take necessary medications such as an inhaler during the exam
- Go over directions orally
- Have someone transfer answers to Scantron bubble sheets or record dictated notes and essays
- Provide wheelchair-accessible testing stations
- Provide a distraction-free room
- Provide Braille or large-print exam booklets
- Have a scribe read materials to the student and take notes for the student
- Allow oral responses, access to speech-to-text support, and a scribe for dictation of written responses
- Allow for testing over multiple days
- Use a familiar proctor/test administrator
- Allow student to read aloud to self before selecting answers
- Provide audio delivery for assessments or a screen reader unless testing reading fluency etc.
- Offer the student study guides and questions that directly relate to the test
- Provide sample or practice tests ahead of time
- Allow screen-reading and voice to text technology
- Divide tests into small sections of similar questions and problems
- Permit the student to do an independent project as an alternative to a test
- Provide test breaks
- Provide and interpreter for students who are Deaf or hard of hearing
- Provide paper format of test otherwise administered digitally
- Mask (block or white out) unnecessary content (such as navigational buttons, menu, additional questions, etc.) so students can focus on one question at a time

This educational material is the intellectual property of The Montana Empowerment Center, Inc and is to be used for educational purposes only.

Writing & Handwriting

- Use worksheets that require minimal writing
- Use fill-in questions with space for a brief response rather than a short essay
- Provide a designated note-taker or photocopy of another student's or teacher's notes (do not expect the student to arrange with another student for notes)
- Provide outlines for videos
- Provide adaptive writing tools, pencil grips, and a slant board or slanted surface
- Allow the student to dictate answers using assistive technology for a scribe (teacher, para or student) to transcribe
- Provide a computer for written work
- Provide access to word processing applications or software, a portable note-taker, a tablet, or a similar device/software
- Provide photocopied materials rather than requiring the student to copy from the board or textbook
- Access to a scribe to write verbal answers in the moment
- Access to speech-to-text software and other technology for written assignments
- Provide partially completed outlines of lectures for students to fill in the blanks
- Explore the use of alternate keyboard options and writing software
- Provide word models and/or tracing opportunities
- Allow word prediction and grammer, spellcheck software
- Provide specially desined paper with raised lines

Behavioral Accommodations

- Pair the student with those who are modeling appropriate behavior for classwork, projects, and mentoring (this can be done both in person and online)
- Reward positive behaviors; increase the frequency and immediacy of reinforcement
- Create a "back pocket pass" the student can use to leave the classroom without asking for permission
- Establish a plan to manage side effects of medication (such as providing a water bottle for thirst or allowing extra bathroom breaks)
- Arrange a "check-in" time to organize the day
- Minimize the use of punishment; amend consequences for rule violations (for example, reward a forgetful student for remembering to bring pencils to class, rather than punishing the failure to remember)
- Develop an individualized behavior intervention plan that is positive and consistent with the student's ability and skills

However, the contents do not necessarily represent the policy of the U.S. Department of Education and you should not assume endorsement by the Federal Government, Project Officer, David Emenheiser.

Behavioral Accommodations Continued

- Ignore behaviors that are not seriously disruptive or inappropriate
- Allow sensory and/or fidget objects to help the student self-regulate
- Develop a system or code word to let the student know when behavior is not appropriate
- Modify school rules that might discriminate against the student
- Arrange for the student to leave the classroom/learning area voluntarily and go to a designated “safe place” when under high stress

This educational material is the intellectual property of The Montana Empowerment Center, Inc and is to be used for educational purposes only.

HEALTH ACCOMMODATIONS

Eating Orally

- Provide 1:1 supervision during lunch and snack times for those with food allergies or who are at risk for aspiration or choking
- Provide verbal or visual cues to chew, swallow, and/or monitor the amount of food taken into the mouth at one time to prevent choking
- Provide a “nut-free” table or classroom for those with severe allergies
- Allow extra time during meals for students with reduced endurance for self-feeding
- Provide the opportunity to snack during instruction or take short breaks from instruction for snacking (for students who may not be able to consume sufficient calories during a designated lunch period)
- Provide behavioral motivators for students who need positive encouragement to eat
- Provide specially designed chairs, utensils, cups, straws, or positioners
- Allow an adult-supported peer group to provide modeling and socialization during meals and snacks

Eating Using a G-Tube

- Administer tube feeds where the student is most comfortable (such as the nurse’s office, lunch room, or classroom)
- Provide designated support staff (nurse or trained assistant) to administer tube feeds
- Monitor for safety during tube feedings
- Allow use of specially designed chairs or positioners during and following tube feeds to allow students to be in an upright position to manage reflux or other medical issues
- Provide stoma site management by school nurse
- Provide an emergency plan with school nurse if the tube becomes dislodged at school

Toileting

- Allow the student to use a single person bathroom
- Provide an accessible stall and an adaptive toilet seat
- If a student wears diapers, provide a private, safe, and sanitary diaper-changing station out of the sight of others, especially peers
- Allow extra time to get to and from the bathroom and while using the bathroom
- Provide nurse support for catheter care

Additional Health Considerations

- Allow a hat to be worn during recess for students with sun sensitivity due to a health condition
- Provide access to temperature-controlled spaces during outside activities in times of excessive heat or cold for students with extreme weather sensitivity due to a health condition
- Provide a “back pocket pass” for leaving class to use a private area for medically necessary tasks
- Provide a 1:1 para during transportation for medical needs

LOW-INCIDENCE ACCOMMODATIONS

Visual Processing

- Provide all materials in enlarged font
- Provide slant boards or slanted surface
- Provide verbal descriptions of visually presented information
- Use high-contrast materials
- Provide a printed copy of what's being presented on the board
- Provide Audio, Brail, or electronically formatted notes, handouts, and texts
- Provide adaptive lab equipment (talking thermometers and calculators, light probes, and tactile kitchen timers)
- Provide a 1:1 para during transportation for medical needs
- Use larger manipulatives
- Reduce clutter on the page
- Provide preferential seating
- Use raised-line drawings and tactile models of graphic materials
- Provide Braille signs, equipment labels and auditory warning signals
- Provide access to a computer with optical character reader, voice output, Braille screen display, and printer output
- Use color-contrast to distinquish written materials

Auditory Processing

- Provide preferential seating
- Provide additional written or visual material
- Simplify directions and verbal instruction
- Reduce background noise
- Provide an FM system to amplify the teacher or other speakers
- Use a peer-pairing system to check notes and/or assignments

877-870-1190 | mtempowermentcenter.org | 1601 2nd Ave N Ste 232, Great Falls, MT 59401

Mobility/Orthopedic

- Provide accessible play equipment or alternatives (e.g., a lighter/softer ball for sports activities; an adaptive tricycle if the playground and field are otherwise inaccessible)
- Provide accesible seating in the classroom, at school-wide events and during toileting (e.g., an adaptive toilet seat)
- Use appropriate workspace height and spacing in the classroom to allow for physical navigation, especially but not exclusively for students who use a wheelchair or walker
- Establish clearly defined times when a student will use a piece of mobility equipment during the day (e.g., time in a stander or walker to ensure physical activity, particularly for students who use a wheelchair)
- If the school has an elevator, make sure the teacher and any classroom or 1:1 paras have a key so the student doesn't have to wait to access it
- Provide physical modifications to assignments for increased fine motor control (e.g., raised lines to help a student stay within the lines on writing and coloring projects)
- Allow extra time to get to the bathroom, from class to class, to and from lunch and recess etc.

Additional Accommodations

- Check progress and provide feedback often in the first few minutes of each assignment
- Introduce an overview of long-term assignments and projects so the student knows what is expected and when it is due
- Provide structured assignments with lists for the student to cross off when finished
- Break long-term assignments and projects into small, sequential steps with daily monitoring and frequent grading
- Allow students the choice to practice presenting in a small group before presenting to the class
- Give the student worksheets one at a time
- Draw arrows on worksheets or the board to show how ideas are related, or use other graphic organizers such as flow charts
- Explore the use of memory organizors (tablets, cell phone calendars, task lists, and visual schedules)
- Establish a regular form of communication between home and school
- Use color-coded materials for each class
- Reward the student for recording assignments and due dates verbally or in writing
- Structure work so that the easiest parts come first or let the student choose what to do first, second etc.
- Allow the use of sensory tools
- Provide locker accommodations (such as a key versus a combination lock)
